MOST EVOLVED GAME TO TOP 3

#1 Halo as number one because you can see the changes in
The graphics as well as the storyline and characters and the obvious work and effort in the graphic novel.

#2 Call of duty series I rank this series number two because of the different variants and of course gameplay evolution.The first game was on a handheld DS and then ranged to PS 5 and all of the playstation series as well as XBox

#3 Mortal Kombat if this series didn't occur to whoever reading this list is actually insane I actually would never call you a true nerd.I rank this number three because of the graphics evolution and the obvious change in the storyline and characters.
